Ms. Carol Hanlon
S&ER Products Manager
U. S. Department of Energy
Yucca Mountain Site Characterization Office
P.O. Box 30307 M/S 025
North Las Vegas, NV 89036-0707

Dear Ms. Hanlon:

I understand that the DOE is accepting written comments with regard to the Yucca Mountain Preliminary Site Suitability Evaluation. I believe this site would serve as a suitable location for our national repository for high-level radioactive waste and spent fuel. Therefore, I am writing to ask that the Department of Energy recommend this site to President George Bush.

Storing high-level radioactive waste at one location is a better option than continuing to accumulate spent nuclear fuel at more than 70 sites throughout the nation. In addition, many years of effort have been spent on siting a national disposal facility and the Department has identified a suitable location.

Sincerely,

Robert E. Kreider Jr.
